

Let's change a file (first.txt in this case) and add a file

```
MINGW32/e/videos/Study/cs/important/Git and github/Notes/main
Dell@SURAJ MINGW32 /e/videos/Study/cs/important/Git and github/Notes/main (master)
$ git status
On branch master
Changes to be committed:
  (use "git restore --staged <file>..." to unstage)
        modified:   .gitignore
        modified:   static/sdfadf.txt

Changes not staged for commit:
  (use "git add <file>..." to update what will be committed)
  (use "git restore <file>..." to discard changes in working directory)
        modified:   first.txt

  (use "git restore <file>..." to discard changes in working directory)
        modified:   first.txt

Untracked files:
  (use "git add <file>..." to include in what will be committed)
        second.txt

Dell@SURAJ MINGW32 /e/videos/Study/cs/important/Git and github/Notes/main (master)
$
```

How to directly commit skipping staging area? → Use "git commit -a -m "Message""

```

```

It will not commit untracked files

We have to manually add untracked files
